The award selection criteria are outlined below. This information should be emphasized when compiling the nomination packet (a nomination template is available upon request). The maximum number of points available in each category is shown in parentheses.

1. **Description of Engineering Achievement (25 points).** Attach a concise project description, including reason for the project, overall engineering requirements, type of construction, cost, funding strategy, and other pertinent engineering data.
2. **Obstacles to Overcome (15 points).** Provide a summary of obstacles overcome by the design, construction, implementation teams during the course of the project (may include obstacles from any aspect or phase of the project (i.e. engineering, public perception, funding, phasing, etc).
3. **Engineering Innovation (20 points).** Describe engineering innovation required or developed during the course of the project.
4. **Safety Features or Solutions (20 points).** Describe any safety related features or solutions of the project, include safety related awards, or specific safety items addressed by the project.

5. Benefit to General Public (20 points). Discuss the benefits to the general public that did not exist before or enhanced by this engineering achievement.

Please compile nomination form and all related attachments as a single PDF document for evaluation. In addition to the nomination packet, please provide four photos (in .jpg or .tiff format) of the engineering achievement with this application for use during the state awards ceremony presentation. *Nomination packages shall not exceed ten (10) 8.5x11 pages inclusive of this form.*

I certify that the above information is correct and will fully disclose all information to anyone who may be concerned.
